Silver Point - Peecho Integration & Workflow Guide

Partner: Silver Point Print-on-Demand (UAE / India) • **Client:** Peecho B.V. (Netherlands) • **Fulfillment SLA:** 24 to 48 Hours

1. Architecture & Domains

- **Platform:** Django REST Framework (Backend) & Next.js (Frontend) — Single Domain Architecture on AWS with S3 storage.

Environment	Webhook Endpoint URL	Security & Behavior
Production	`https://orderflow.silverpointprint.com/api/v1/peecho/webhook/`	HMAC-SHA256 (`X-Peecho-Signature`) + TLS 1.3 (`is_sandbox = False`)
Staging (Sandbox)	`https://staging.orderflow.silverpointprint.com/api/v1/peecho/webhook/`	Sandbox Secret Key Validation (`is_sandbox = True`, isolated from live press & billing)

2. Simple Workflow Overview (5 Steps)

- **Step 1: Ingestion:** Peecho sends orders via Webhook; Staging orders are automatically tagged with `is_sandbox = True` (`TEST ORDER`) to isolate them from live production queues and invoicing.
- **Step 2: Prepress:** Print-ready interior and cover PDFs are downloaded from AWS S3 and checked for DPI resolution, spine width, trim size, and bleed margins.
- **Step 3: Batching & Job Tickets:** Approved orders are grouped by paper stock (GSM) and size format, with printable QR Code Job Tickets generated for the press floor.
- **Step 4: Shopfloor Printing:** Operators scan the QR Job Ticket with a mobile phone camera or barcode scanner to update live status: `Printing -> Binding -> QC`.
- **Step 5: Dispatch & Callback:** Shipping staff scan the courier AWB barcode label and the system automatically syncs the tracking number and carrier details back to Peecho.

3. API Integration Specs

A. Inbound Webhook (`POST /api/v1/peecho/webhook/`)

Receives customer order payload, shipping address, line items, and PDF artwork links, secured via HMAC-SHA256 (`X-Peecho-Signature`).

```
{
  "event": "order.created",
  "order_id": "PEECHO-904120",
  "priority": "EXPRESS_24H",
  "currency": "EUR",
  "total_amount": "48.50",
  "carrier": "DHL Express",
  "customer": { "name": "Jan de Vries", "email": "jan@example.nl" },
  "shipping_address": {
    "recipient_name": "Jan de Vries",
    "street": "Keizersgracht 241",
    "city": "Amsterdam",
    "postal_code": "1016 EA",
    "country": "NL"
  },
  "items": [
    {
      "item_id": "ITEM-01",
      "product_type": "Hardcover Photo Book A4",
      "quantity": 1,
      "page_count": 64,
      "paper_stock": "200gsm Silk Inner + 350gsm Matte Cover",
      "pdf_artwork_url": "https://s3.eu-west-1.amazonaws.com/peecho-print/904120/interior.pdf",
      "pdf_cover_url": "https://s3.eu-west-1.amazonaws.com/peecho-print/904120/cover.pdf"
    }
  ]
}
```

B. Outbound Shipment Callback (`POST /v2/orders/{id}/shipment`)

Triggered automatically upon AWB barcode scan at Dispatch. Sends the tracking code, carrier name, dispatch date, and tracking URL back to Peecho.

```
{
  "peecho_order_id": "PEECHO-904120",
  "carrier": "DHL Express",
  "tracking_code": "1234567890",
  "shipment_date": "2026-11-04T14:30:00Z",
  "tracking_url": "https://www.dhl.com/en/express/tracking.html?AWB=1234567890"
}
```
