Silver Point - Peecho Production Workflow Manual

Operational Shopfloor Procedures, Environment Isolation & SLA Standards

1. Environment Overview (Single Domain + Key Routing)

Mode	Webhook Endpoint URL	Key & Shopfloor Behavior
Live Production	`https://orderflow.silverpointprint.com/api/v1/peecho/webhook/`	Authenticated via **PEECHO_PRODUCTION_SECRET_KEY** (**is_sandbox = False**). Enters live Prepress, Press, Dispatch, and Billing queues.
Staging Sandbox	`https://orderflow.silverpointprint.com/api/v1/peecho/webhook/`	Authenticated via **PEECHO_STAGING_SECRET_KEY** (**is_sandbox = True** / **TEST_ORDER**). Displays amber SANDBOX badge; excluded from live press & invoices.

2. 5-Step Shopfloor Production Workflow

Stage	Station	Operational Procedure & Status Transition
Step 1	**Order Ingestion**	Automatic order intake from Peecho on **/api/v1/peecho/webhook/**. Orders signed with the Staging key are tagged **is_sandbox = True** (**TEST_ORDER**); Live orders enter status **RECEIVED**.
Step 2	**Prepress Inspection**	Automated & operator PDF artwork inspection: verifies 300 DPI resolution, page count, spine width, and 3mm bleed. Transitions to **PREPRESS_PASSED**.
Step 3	**Imposition & Job Tickets**	Orders are grouped into production batches by paper GSM, trim size, and binding type. Printable **QR Job Tickets** are generated (status: **BATCHED**).
Step 4	**Press Camera Scanning**	Operators scan the QR Job Ticket via mobile camera at each station: **Queued** → **Printing** → **Cutting** → **Binding** → **QC Passed**.
Step 5	**Barcode Dispatch**	Dispatch scans courier AWB barcode label, packs parcel, and marks **DISPATCHED**, automatically syncing tracking info back to Peecho.

3. SLA Commitments & Reprint Policies

- **Turnaround SLA:** Standard & Express POD orders are fulfilled and handed off to courier within **24 to 48 Hours** of ingestion.
- **In-Plant QC Rejection & Reprint:** Any item failing press or bindery quality audit is flagged at the QC station and routed into an immediate priority reprint batch within the original SLA window at zero additional charge.
